Subject: Microsoft Settlement

I strongly suggest that Microsoft will be looked upon in a favorable way in this settlement. Microsoft has become a giant in its industry and maybe some of the business practices are illegal and too aggressive. All I know is that Microsoft does many good things in my surrounding communities (I am from Washington State). Microsoft has made many millionaires and has allowed many of its employees to become very wealthy. This contributed to more spending and has helped to drive the economy not just here. Microsoft has shared its wealth freely and I do not consider this company to be a greedy corporation just looking after its very own wealth.

By the way, I did notice that economies nationwide were going great until lawsuits with Microsoft came into the works. It seems to have upset many markets. Please do not do with Microsoft what has been done to AT&T when the divestiture took place.
